## PROJECT NAME: LARRY STREET (CDBG) PROJECT NUMBER:

**Description:** This project is a part of a Community Development Block Grant (CDBG) funded in part by the federal government (HUD) for improvements to areas with low to moderate income. The improvements include reconstructing Larry Street along with a portion of Commerce Street between Delia and Larry Street. Also included is the installation of an underground storm water system, a new waterline and fire hydrants, and reconstruction of the sanitary sewer lines under the pavement. Sidewalks will also be installed where none exist today. The paving will meet the City's subdivision standards.

Justification: The existing asphalt roads will be replaced with concrete curb and gutter streets. The waterline and fire hydrants will provide adequate fire protection. The majority of the funding for the project is from federal funds.

## Project Status

This is the last street to be improved in the Oliver's Addition south of Main Street. This project is funded by a Community Development Block Grant. The surveying is complete and the engineering is ongoing. The design is 90% complete and staff is reviewing the final plans.
